Ponte Vinanti D5	58
Tre Ponti e Ponte Zuccato C5	48

CATALOGO VENEZIANO

Il catalogo veneziano è un inventario degli oggetti notevoli che costituiscono il tessuto urbano di Venezia. I ponti sono l'oggetto del secondo capitolo della mappatura e vengono qui numerati e codificati.

Il libro si compone di due parti:

La prima è una rappresentazione "geografica": i ponti sono inseriti nella morfologia della città ma isolati dagli elementi urbani che li circondano. Questo capitolo è un indice grafico in cui ad ogni ponte vengono associati un numero progressivo e un codice univoco.

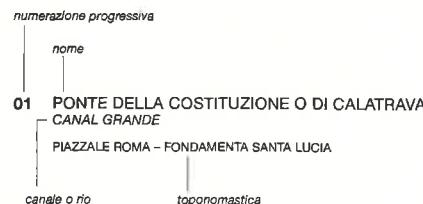

SC01-CST

SC è la codifica del sestiere, in questo caso Santa Croce
01 è il numero progressivo secondo cui il ponte è ordinato
CST è un codice di 3 lettere che identifica il nome del ponte

Nella seconda parte i ponti pedonali e pubblici della città sono schedati e rappresentati singolarmente. Ogni scheda illustra la planimetria del ponte tra le isole che collega, in rapporto al tessuto edilizio che lo circonda e allo spazio pubblico sui cui insiste e con cui entra in relazione.

L'ordine progressivo della numerazione segue un itinerario percorribile attraverso il sestiere. In ogni scheda sono indicati il nome del ponte, il nome del canale o del rio che attraversa e la toponomastica delle rive che collega. Per ciascuna riva è indicata la relativa quota altimetrica sul livello del mare espressa in centimetri.

Il catalogo veneziano è un inventario degli elementi notevoli che costituiscono il tessuto urbano di Venezia. I ponti sono l'oggetto del secondo capitolo della mappatura.

La catalogazione è un metodo di indagine applicabile alle città, un dizionario grafico delle parole che le costituiscono.

Il risultato vuole essere una risorsa e uno strumento di ricerca: una guida alternativa rivolta a tutti, dall'approccio didascalico, ma fonte di informazioni utili per inventare una nuova esperienza esplorativa.
